# Assumption College

Sandwich, Ontario

---

The building, which up to 1875 had been large enough to supply the needs of the Catholics of Western Ontario for higher education, was erected at Sandwich by the Jesuit Fathers. Here in 1857, those world-famed educators of Catholic youth erected the original building of the regular college group, and opened classes in order to give a religious and classical training to the young men of the district and surrounding country. Before two full years had elapsed, however, these zealous instructors had been called away to other more pressing work. The college, during the next decade, passed successively through the hands of the Benedictines, of the Basilians, and to the late Theodule Girardot, who afterwards filled the position of the Inspector of Public Schools in the County of Essex. In 1870, the late Dr. Walsh, then Bishop of London, seeing the need of establishing the College on a more permanent basis, called upon the Priests of St. Basil to take charge once more of Assumption College. The prospects of success, he felt, were now brighter; the Catholics of the neighborhood were prosperous; and this, together with the proximity of the fast growing metropolis of the great State of Michigan, just across the border, promised a large field of usefulness to the College.

Father Denis O'Connor, now the Most Rev. Archbishop of Toronto, headed the little band that came to take charge of Assumption College in September of 1870. That the choice of Superior was a wise one is evidenced by the splendid success with which the College was conducted under the new regime. Himself a trained scholar, a born teacher, and typical disciplinarian.

ian, Father O'Connor possessed the happy faculty of infusing part of his own energy and resistless perseverance into the hearts of the small staff of professors that shared his labors; and thus the College grew and prospered. Owing to the ever increasing attendance of students from both Ontario and the adjacent States, it was found necessary in 1875 to add to the College buildings, and still again in 1883; so that now there is ample accommodation in the Institution for some two hundred boarders. In the near future the Basilian Fathers hope to be able to complete the buildings by the addition of another wing in which will be a handsome Chapel and a College Hall.

In 1890, Dr. O'Connor was called to the See of London to succeed the Right Rev. Bishop Walsh, who had been raised to the Archiepiscopal See of Toronto. The impetus for good given the College by its first President after the Basilians had assumed permanent charge still continues to keep it abreast of the times, and true to its principles of training youth in "Virtue and Discipline and Knowledge."

The situation of the College on the south bank of the Detroit river, the salubrious climate of extreme Western Ontario, the excellent discipline and thorough system of instruction in both the Classical and Commercial Courses, make Assumption College a most desirable, residential school for boys.

## General Conspectus of Studies

---

The College, in carrying out its idea of Education, aims at forming the whole man—the moral, the intellectual, and the physical. It teaches science and discipline, trains the higher faculties of the soul, and makes right living the great end to be obtained.

Religion and Science go hand in hand throughout the course, and these, aided by a discipline, mild yet firm, furnish the only certain way to turn out men of a Christian character, of learning and of self-control. This is our hope, that the students who pass through our hands will make good priests in the Church, or worthy laymen, able to hold their own in whatever walk of life their lot may be cast.

The Preparatory School is designed for young boys, to prepare them for entrance into the Commercial or the Classical Course. At this time of life a boy should be able to decide whether he intends to follow commerce or to study for one of the liberal professions. The Commercial Course prepares him for the one, the Classical fits him for the other. The two years' Commercial Course forms his judgment, gives him a clear insight into commercial relations, and makes him familiar with the theory and practice of business transactions.

The Classical Course enables him not only to translate, but to read the Latin and the Greek authors. It embraces a period of seven years. The first three years are Academic, designated First, Second and Third Academic, and prepare the student for the course of Arts, occupying four years, and designated Belles-Lettres, Rhetoric, Junior and Senior. Classics and Literature are made the basis of classification. Mathematics are so arranged as to enable those who have made all their studies with us to take

the work of their respective years, and at the same time to allow pupils who have made part of their course elsewhere to follow a lower or a higher class according to their standing in this subject: French and German are optional until the pupil reaches his Second Academic, when he is obliged to select one of these languages. After having made his selection, he is not allowed to change.

---

## RELIGIOUS INSTRUCTION.

A Catholic College, as such, can have no other reason for its existence than the necessity which is felt to exist of teaching religion. Education without religion is a misnomer, which may produce learned infidels, but leaves the individual without any object in life beyond the desire of acquiring the mere material goods bestowed by the world on its votaries. Hence, as religion is the reason of our existence, religious instruction is given in all the years. From the elementary truths taught in Preparatory School, the student is led through a well graded course of Christian Doctrine and Church History, during which he not only learns to give a reason for the faith that is in him, but breathes an atmosphere of Catholicity, that gives tone to his whole after life, and makes him a true son of the Church, whether he serves her in the world or in the sanctuary.

---

## PHILOSOPHY.

The Classical Course finds its natural compliment and perfection in the study of Philosophy, the foundation of all science and the handmaid of Theology. The Philosophy taught in the college is the Philosophy of St. Thomas, which combines the best of ancient thought with the teachings of the great exponents of Catholic doctrine, and which is warmly recommended by our Holy Father, Pope Leo XIII., in his Encyclical Letter *Æterni Patris*, of the fourth of August, eighteen hundred and seventy-nine. The

Course embraces Logic, Mental Philosophy and Ethics. In addition to these subjects, students in Philosophy are required to pursue their studies in Latin, Greek, English, French or German, Mathematics and Chemistry. In all these subjects they have access to numerous books of reference. They are members of a Literary Association and of a Dramatic Club, in which they have excellent opportunities of improving themselves in English Literature and Elocution. They are provided with rooms and have the advantage of a special rule. The grade is that of the third and the fourth years in the Arts Course.

---

### CLASSICS.

For many hundred years the Classics have been reputed the best instrument of mental training. The study of them is fitly called a LIBERAL education, because it emancipates the mind and is the apprenticeship everyone must serve before becoming a "free brother of the guild which passes the torch of life from age to age." Notwithstanding the views latterly advanced as to their utility, we still believe that no discipline is more useful where the aim is to impart broad culture with accuracy in scholarship. The master minds in Church and State, trained in this gymnasium, are guarantee sufficient that we do right in giving much time to the study of the Classics, and in teaching them in such a way that the student can not only translate but read them, that is to say, take into his own mind the thoughts and ideas of the author without a conscious appeal to the vernacular equivalent.

---

### MATHEMATICS.

The study of Mathematics is in itself an education. It is one of the most powerful factors in forming the judgment, and helps to develop the reasoning powers, probably, to a greater extent than does any other study. Hence it has an importance, in

any scheme of education, that cannot be neglected, and can hardly be over estimated. Knowing this, we have made our Courses in Arithmetic, Algebra, Geometry, and Trigonometry very complete, and they fit the student for an intelligent study of Natural Philosophy and applied Mathematics.

---

## NATURAL PHILOSOPHY AND CHEMISTRY.

While our Courses in Natural Philosophy and in Chemistry have been always strong, this year we propose to render them more efficient by fitting up a better equipped cabinet of science and laboratory, where each student may work his own experiments under the supervision of the Professor, thus fixing in his mind the phenomena of matter and energy and enabling him to study the laws which govern and underlie them.

---

## FRENCH AND GERMAN.

The knowledge of some modern language other than one's own is becoming more and more necessary every day, especially in a country like this which represents many nationalities. It is necessary not only to the business man on account of the wonderful increase of trade between America and the Old Countries, but also to the scholar and to the Priest—to the scholar who cannot afford to ignore the literatures of languages closely related to his; and to the Priest, who, by the nature of his calling, comes into contact with people of different tongues to whom he must dispense, by word of mouth, the bread of doctrine and the consolations of Holy Church. Realizing the importance of this fact, and considering that many of our students are from localities in which a knowledge of French or German may be necessary, the study of these languages is made part of the Course. The Course in each is six years. These languages are taught without

extra charge, and the facilities afforded the students to master them are unsurpassed .

---

## MUSIC.

Individual lessons are given in pianoforte, singing, violin, mandolin, and other stringed instruments. Opportunities are offered for the practice of ensemble playing. Once a week a class is held for the special study of Liturgical Chant. Occasionally entertainments are prepared, in which pupils that are sufficiently advanced are requested to take part. A Glee Club is maintained in the College for the special practice of part singing, and all the pupils gifted with sufficient voice and musical temperament may become members of it.

---

## STUDENT SOCIETIES.

Various societies and associations have been organized for the promotion of religion, sociability, and literary activity. The Sodalities have a chapel, in which a devotional meeting is held once a week, consisting of a short instruction, chanting office, singing of hymns, and Holy Mass. The literary societies hold bi-weekly reunions for the reading of essays, debates, etc. A well-equipped reading room is opened to the students every evening and on the afternoons of holidays. A favorite resort for senior students, during the winter evenings, is a well furnished club room, in which they while away many an otherwise dull hour in pleasant social intercourse.

## Discipline

---

Any system of education which trains the intellect without developing the moral side of character, falls short of its purpose; for education must make the student not only a scholar, but especially a man of rule and good manners. Hence it is that order and regularity, promoted by a firm and wise discipline, are indispensable in a college. They are indispensable in the study-hall, in the class-room, and in the playground; in the study-hall, where solid work is not possible without quiet and silence; in the class-room, where the success of both teachers and pupils depends in a large measure upon the discipline that reigns there; and in the playground, where the boys are expected to be upright and gentlemanly in behaviour. Therefore, the following regulations are enforced at the College:

No student shall leave the College grounds without permission.

No branch of study shall be taken up or discontinued without the consent of the Director of Studies.

No student shall be permitted, except for reasons of absolute necessity, to absent himself from College during term time. Students returning late in September, or failing to report promptly after the Christmas recess, shall forfeit their right to compete for special prizes and honors.

The students are strictly forbidden to lend or borrow money, or to exchange or sell personal effects of any kind.

Any damage done by a student to the furniture, instruments or books of the College, shall be chargeable to his account.

The use of tobacco is strictly forbidden.

Day scholars are not allowed to take out letters or to perform errands of any kind for the boarders.

Obstinate disobedience, incorrigible sloth or giddiness, the use of intoxicating liquors, to introduce into the house or read books of an immoral or irreligious character, to leave the College limits without permission after six o'clock p. m., are faults too grievous to be punished, and for which the student shall be expelled from College.

Every candidate for admission shall present a certificate of good, moral character; and if he comes from another institution, a letter of honorable dismissal.

There are two written examinations in the year: the FIRST immediately before the Christmas holidays, and the FINAL before the close of the academic year.

The classes of new students are determined by examination at the time of entrance.

Students are promoted in course at the beginning of each scholastic year in September, if they have attained the required standard in the class-work, and the examinations of the preceding year.

At the examinations the standard is as follows: (1) for PASS thirty-three per centum of the marks assigned to each paper and fifty per cent. of the total marks for all the papers; (2) for SECOND-CLASS HONORS, sixty per cent. of the total marks for all papers; and (3) for FIRST-CLASS HONORS, seventy-five per cent. of the total marks for all the papers.

Students who fail in any subject at the examinations are required to pass a supplemental examination in that subject before being admitted to the work of the ensuing term.

Failure in any three subjects at the Final examination involves the loss of the year.

Official monthly reports of each student's progress and deportment and class standing will be sent to the parents or guardians. These reports also give information of the marks obtained at the examinations.

## Physical Culture

---

The Basilians have ever recognized the necessity of training the whole man; so while they have provided for the moral and the intellectual well-being of their pupils, as may be seen from the curriculum of studies, they have not been unmindful of the physical culture of the boys. Although games and amusements are never allowed to encroach upon the more serious work of college life, yet a large campus and shaded walks afford ample opportunity for outdoor sports; and spacious hand-ball courts, etc., provide for indoor recreation in inclement weather.

The supervision of all athletic matters has been entrusted to an Athletic Board, consisting of three members, elected by the students, and one appointed by the faculty.

To assist in meeting the expenses of "the Yard," an annual fee of one dollar and a half is imposed on each student.

## Preparatory School

---

The desire to meet a popular demand has led to the establishment of a preparative course in the College; it is known as the Preparatory School, and is intended for boys usually under the age of fourteen years. Instruction in the elementary branches of an English education is here imparted, and scrupulous attention paid to the up-bringing of the little fellows. They have their own play-ground, study-hall and dormitories. During the hours of recreation, as well as in the school rooms, they are always under supervision. The discipline is mild and recourse is seldom had to punishment, those in charge endeavoring to govern by kindness, and by appealing to the little boys' sense of honor. Neatness, diligence and piety are particularly inculcated, and especial attention is bestowed toward preparing for first Holy Communion. By way of encouragement, the best behaved are admitted to membership in a religious society, called the Guardian Angel of the Sanctuary; whilst the names of all whose conduct and application are satisfactory, appear in the college catalogue under the heading of **ROLL OF HONOR**.

The course of study in this department is divided into three grades, called Grade A, Grade B, Grade C, and corresponds to Forms V, IV, III of the common schools, respectively. The subjects taken up in each grade are those prescribed by the education department of Ontario, for the corresponding forms.

There are three teachers in charge of the department. Class is taught each week-day morning from nine to twelve o'clock, with proper recess, and from a quarter before two until half past four o'clock, except Wednesday and Saturday afternoons. The course covers a period of three years and prepares the young student for entrance into the High Schools of Canada, and admits him to the commercial or the classical course in the college.

## SCHEDULE

### GRADE C.

- READING—The Third Reader; literature of every lesson.  
SPELLING—Oral spelling, and dictation on paper; blackboard exercises.  
WRITING—Copy Books Nos. 3 and 4.  
GEOGRAPHY—Definitions; General Geography of the Dominion of Canada; North and South America; Ontario, Michigan, Ohio, more particularly; Map Drawing.  
GRAMMAR AND COMPOSITION—Classes of words and their inflections; Simple Analysis; Descriptive and Letter-Writing.  
HISTORY—Conversations on Canadian and United States History.  
ARITHMETIC—Reduction; Compound Rules; Bills and Accounts; Averages and Aggregates; Sharing and Measurements; Mental Arithmetic.  
CATECHISM—Butler.  
BIBLE HISTORY—Spalding.

### GRADE B.

- READING—The Fourth Reader; the literature of every lesson.  
SPELLING—Systematic Orthography and Orthœpy.  
WRITING—Copy Books Nos. 5 and 6.  
GEOGRAPHY—Canada and the British Empire; the United States; the Continents; Map Drawing.  
GRAMMAR AND COMPOSITION—Etymology; Analysis; Descriptive, Narrative, and Letter-Writing.  
HISTORY—Canada and the United States.  
ARITHMETIC—Measures; Multiples; Fractions; Percentage; Interest; Mental Arithmetic.  
CATECHISM—Butler.  
BIBLE HISTORY—Spalding.

### GRADE A.

- READING—Practice in oral reading.  
WRITING—Copy Books Nos. 6 and 7.  
ENGLISH GRAMMAR—Etymology and Syntax, including the inflection, classification, and elementary analysis of words and the logical structure of the sentence.  
COMPOSITION—Descriptive and Narrative; Essays on familiar subjects; letters.  
HISTORY—Canada and the United States.  
GEOGRAPHY—Canada, United States, Europe, British Isles  
ARITHMETIC AND MENSURATION—Proofs of Elementary rules; Fraction (theory and proofs); Commercial Arithmetic; Mensuration of rectilinear figures.  
CATECHISM—Butler.  
BIBLE HISTORY—Spalding.

## IV

# Commercial Course

---

The fact is coming home more and more every day to business men, that the successful man has to know many things besides the mere routine of business transactions. He must be able to grasp the problems involved in capital and labor, in supply and demand; he must have a comprehensive idea of trade relations, of commerce, both domestic and foreign, and be able to express his views easily and forcibly; so that a commercial education is a very complete education, and needs a training not inferior to that required for a study of the liberal professions. In fact, now-a-days, commerce is a profession. It requires more than a knowledge of book-keeping, type-writing, or stenography. These are but a small, though an essential part of a commercial education, since the business man can always engage others to do his clerical work and yet requires the knowledge to correct and audit. Therefore, while making these departments as strong as possible, we endeavor throughout the whole course, to give the student a comprehensive knowledge of literature and science, making our commercial department a thoroughly good one.

ALGEBRA A—This course is designed for beginners in Algebra, and comprises a complete study of the primary operations and fundamental principles of the science: Simple Equations; Symbolical Expression; Highest Common Factor; Lowest Common Multiple. Elementary Fractions; Simultaneous Equations; Involution; Evolution.

“ B—This course begins with the study of factors; Fractions; Harder Equations; Harder Problems; Quadratic Equations; Harder Factors; Miscellaneous Theorems and Examples; the Theory of Indices; Surds.

“ C—This course begins with a review of Indices and Surds. Then follows a study of Ratio, Proportion and Variation; Arithmetical, Geometrical, Harmonical Progression; Theory of Quadratic Equations; Permutations and Combinations; Binomial Theorem; Logarithms; Scales of Notation; Exponential and Logarithmic Series; Interest and Annuities.

GEOMETRY A—Euclid, Book I; Deductions.

“ B—Euclid, Books II and III; Deductions.

“ C—Euclid, Books IV and VI; Definitions of Book V; Deductions. Euclid Reviewed.

TRIGONOMETRY A—The measurement of Lines and Angles; Ratio of the Circumference of a Circle to the Diameter; how to convert the Measures of Angles from one to another System of Measurement; Contrariety of Direction; Trigonometrical Ratios; the Changes in Sign and Magnitude of the Trig. Ratios of an Angle; Ratios of Angles in the First Quadrant; Relations between the Trig. Ratios for the same Angle; Comparison of Trig. Ratios for different Angles; Solution of the Trig. Equations; the Trig. Ratios of two Angles; The Trig. Ratios for Multiple and Sub-Multiple Angles.

TRIGONOMETRY B—Logarithms; Trig. and Log. Tables; Relations between sides of a Triangle and Trig. Ratios of the Angles of the Triangles; Heights and Distances Measured; Areas of Triangles, Polygons, and Circles.

CHEMISTRY A—(a). Difference between Physical and Chemical Phenomena; Elements; Atomic Weights; Laws of Definite Proportions; Ancient Chemical Theories; Theory of Quantivalence.

(b). Acids, Bases, Salts. Chemical Nomenclature.

(c). Hydrogen, Oxygen, Nitrogen. Phosphorus sulphur and their principal Compounds.

(d). Laboratory work under the direction of the Professor.

“ B—(a). Non-Metals continued: Carbon and the principal Carbon compounds.

(b). Metals: Potassium, Sodium, Calcium, Iron, Zinc, Copper, Mercury, Silver, Gold.

(c). Electrolysis and Elements of Analysis.

(d). Laboratory work under the direction of the Professor.

#### NATURAL PHILOSOPHY A—MECHANICS.

(a) Motion and Force; Uniform and Accelerated Motion; Forces of Gravity; Relations of Time, Space and Velocity; Work; Energy.

(b) Composition and Resolution of Forces; Principle of Moments; Equilibrium; The Centre of Gravity.

(c) Machines: The Lever; the inclined Plane; Pulleys; the Wheel and the Axle; the Pendulum; Central Force.

#### HYDRAULICS.

(a) Principle of Transmission of Pressure in Liquids; the Hydraulic Press; Centre of Pressure.

(b) Specific Gravity; Methods of finding the Specific Gravity of Solids and Liquids.

(c) Capillary Action; Hydraulic Pumps; Water Waves.

#### PNEUMATICS.

(a) Characteristics of Gases; Pressure of Gases; Toricelli's Tube; Mariotte's Law; Barometer.

(b) The Air Pump; Atmospheric Pressure; The Siphon; Forcing and Suction Pumps; Manometers.

#### ACOUSTICS.

(a) Nature of Sound; Velocity of Sound in different Media; Sound Waves; Refraction; Reflection and Inflection of Sound.

(b) Musical Sounds; the Sonometer; Vibration of Air in Pipes; Vibration of Rods and Plates; the Voice.

(c) Musical Scales; Numerical Relations of Notes and Intervals; the Chromatic Scale; Harmonics; Musical Instruments.

## NATURAL PHILOSOPHY B—OPTICS.

- (a) Velocity of Light; Photometry; Reflection of Light; Plane, Convex and Concave Mirrors; Real and Vertical images.
- (b) Refraction of Light in different Media. Determination of the Index of Refraction. Lenses. Principal Focus; Conjugate Foci.
- (c) Decomposition of Light: The Spectrum. Complementary Colours. The Spectroscope. The Rainbow. Polarisation of Light.
- (d) Vision. The Eye. Eye-pieces. The Microscope. The Telescope.

## HEAT.

- (a) Nature of Heat. Expansions of Solids, Liquids and Gases. Coefficient of Expansion. The Thermometer. Conduction and Radiation of Heat.
- (b) Specific Heat. Methods of finding Specific Heat. Latent Heat.
- (c) Tension of Vapours. Dalton's Laws. The Steam Engine. Mechanical Equivalent of Heat.

## MAGNETISM.

- (a) Natural and Artificial Magnets. Magnetic Poles. Magnetic Fields and Lines of Force.
- (b) Magnetism of the Earth. The Magnetic Needle. The Dip of the Needle. The Mariner's Compass.

## ELECTRICITY.

- (a) Static Electricity. Conductors and Insulators. Potential. Electrostatic Induction. The Electroscope. The Leyden Jar. Electrical Machines.
- (b) Current Electricity. Cells. Units of Current, Quality and Resistance. Ohm's Law. Wheatstone's Bridge. Effects of Current on a Magnet. Ampere's Theory of Magnetism. Galvanometers. Telegraph.
- (c) Electro-Magnetic Induction. Lenz's Law. Induction Coils. The Telephone. Dynamos and Electric Motors.
- (d) Electro-Chemistry. Electrolysis. Electroplating. Relations between Electricity and Heat.
